the Quick Touch™ Crisp

Product Description:

Integrated Crisper Pan Browns and Crisps Food for Added Flavour and Texture

The easy to use inverter microwave combines more even heating, brown and crispy results, with the easy to use features of the Quick Touch. This microwave knows the right power level and time to suit different food types and switches to grill when it's needed.

The integrated crisper pan with an in-built preheat function works in conjunction with the microwave and grill to crisp and brown foods that normally become soggy from standard microwave reheating such as pies, quiches, pastries and pizza.

With a simple press of a smart button the microwave offers a selection of the most commonly used food types in cook, grill, reheat and defrost modes. Microwave and grill times and power levels are automatically determined for optimum results.

The shortcuts panel on the inside door makes the microwave very easy to use. The one-touch auto buttons provide access to your favourite setting and commonly used tasks such as melting chocolate, softening butter, baking potato and toasting a sandwich.

30 second instant start and A Bit More™ add further simplicity to the ease of use. The intuitive inverter microwave that delivers the ultimate crisp !

the Crispy Microwave Book
Food that taste best crispy.
