

PVA175CN

smeg 72cm gas cooktop, ULTRA-LOW PROFILE

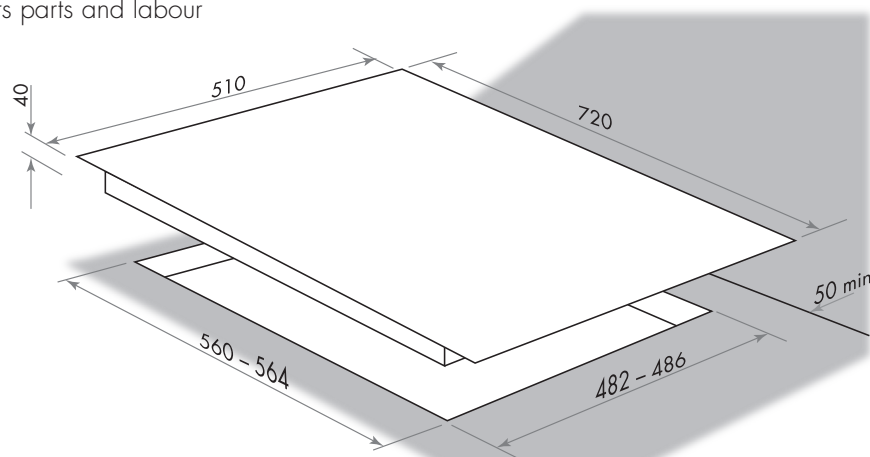

The ceramic glass cooktop resists heats of up to 800°C, and was researched and developed to guarantee optimal performance – it is extremely robust, durable and user friendly. The actual glass is black in colour, not printed, making it undoubtedly a stunning piece with a unique purity and uniformity that is complemented by the matching knobs, pan stands and burner caps. The pan stands are made from a single piece of cast iron and finished in black enamel, offering the advantage of no joins and therefore a more robust piece easier to clean.

Finally, the stunning ultra low profile burners are made from black enamel to guarantee maximum aesthetic consistency teamed with an efficacious performance in durability and resistance.

#### EAN
