

### Description:

With 16million colours to add excitement to your room, i.h.t. smart lighting offers an easy way to brighten up your room and create the perfect ambience for any occasion. No gateway required, no wiring needed, simply screw into your existing light fittings, your home lights can be controlled by dedicated i.h.t. app or voice commands.

Each i.h.t. light bulb is connected to your WIFI network for simple and stable wireless control of your lighting. Able to be controlled through the dedicated i.h.t. app, Google Assistant and Amazon Alexa, you can schedule light times, set light colours, turn your lights on/off and more, all from your smartphone or voice control hub. Each i.h.t. light bulb is tested to last for 25,000 hours and backed up with a 2-year product warranty.
