## 1 HotBlast™ Technology

### Crispy Outside, Juicy Inside

Through the top multiple air-holes, powerful hot air is directly falling onto the food. This helps achieve a crispy texture by distributing hot air heat from top to bottom evenly and helps keep food juicy inside due to the fast cooking time.

## 2 SLIM FRY™ Technology

SLIM FRY™ technology, helps you prepare great-tasting foods with minimal oil.

The hot air is circulated in a way that helps quickly cook your favourite foods, like chicken nuggets, to crispy perfection

## 3 Wide Grill

### For Even Browning

## Ceramic Enamel Inside

### Peace of Mind

Rest assured with Samsung's 10 year warranty on the interior Ceramic Enamel cavity (inclusive of parts and labour).\*

### Easy to use

The MC32K7058CT is designed to help cook delicious fuss-free microwave meals. Samsung's non-stick, Ceramic Enamel interior is designed to be easily cleaned with a damp cloth.

### Reduces Bacteria

Samsung's Ceramic Enamel is designed to help reduce the growth of certain common bacteria, which helps provide a clean interior cooking surface. \*\*

### High Scratch and Rust Resistant

The Ceramic Enamel surface is both hard wearing and scratch and rust resistant. It is also resilient to staining and discolouration which may be caused by the cooking process.

## Premium Design

Samsung's latest Microwave Oven offers high style design fitted for your kitchen.
