the Breville Precision Brewer® Thermal

Product Description:

The world's first 1.8L drip coffee maker with the precision required to brew craft filter coffee, automatically. Experience your favourite coffee at its best regardless of its origin, age or roast with precise temperature and brewing time.

Automatic Presets with Customisable Settings: With six unique brewing modes you can enjoy the perfect, balanced coffee exactly the way you like it. Brew a variety of craft coffee at home through customisable flavour and taste settings using a variety of filters to deliver the type of brew desired. Preset modes include Gold, Fast, Strong, Iced and Cold Brew. To fine tune taste you can adjust bloom time, flow rate and brewing temp or brew pour over using a drip adapter with your favourite pour over device

Precise & Adjustable Temperature Control: Great tasting coffee requires precise control over temperature, flow rate and contact time.

1. PID Control: Adjustable and precise digital temperature control delivers superior tasting coffee by extracting the best flavours.

2. Pump: Option to select from 3 different flow rates to optimise contact time

3. Thermo-Coil Heating System:

The thermo-Coil delivers water that is more pure than typical brewing systems that use aluminium.

Gold Cup Standard: In Gold Cup pre-set mode, The Breville Precision Brewer® automatically adjusts the water temperature and brew time to meet the standards set by the SCA.

Small Cup™ Detection and Auto 'Steep & Release' Technology: Breville's patent pending Steep & Release valve holds the water in contact with the coffee when small cup volumes are being brewed without the carafe in place, automatically.

My Brew Setting: Allows you to customise any of the parameters like bloom time, brew temperature and flow rate to suit the particular coffee you're using - whether its more floral, fruity, earthy and so on.

Dual Filter Baskets: Brew any volume of coffee exactly how you like it with the Flat Bottom & Cone Filter baskets, both included.

Product Technical Specs:

- 6 pre-set modes incl. Gold Cup
- Precise & Adjustable (PID) Temperature Control
- Small Cup™ Detection & 'Steep & Release' Technology
- Dual Filters Baskets - Flat bottom & Cone Filter
- Designed to suit your favourite Pour Over Adaptor
- Precise & Adjustable Temperature Control: Water temperature can be adjusted between 92-96 degrees as per SCA guidelines.
- **PID Temperature Control:** The thermo-coil heating and pump system has PID digital temperature control providing adjustability and precision far greater than a traditional horseshoe shaped element system.
- **Small Cup™ Detection & 'Steep & Release':** This innovative feature controls water and coffee contact time when brewing single serve volumes up to 500ml or when making Cold Brew.
- **Dual Filter Baskets:** Flat Bottom & Cone style Baskets included
- **Settings:** Gold Cup, Fast, Strong Brew, Ice Coffee, Cold Brew, My Brew
- **Voltage:** 220-240 Volts
- **Capacity:** 1.8L / 12 Cup
- **Water Tank Capacity:** 1.8L / 12 cup
- **Dimensions:** 17cm x 31cm x 40cm
- **APN Number:** 9355973084962
- **TUN Codes:** 19355973084969
- **Unit Weight (kg):** 4.9kg
- **Gross Shipping Weight (kg):** 6.6kg
- **Units per Carton:** 1 pc
- **Units per 20 Feet:** 518 pcs
- **Units per 40 Feet:** 1,080 pcs
- **Units per 40 Feet HQ:** 1,220 pcs
- **Shipper Dimensions (HxWxL mm):** 487 x 406 x 242
- **Product Dimensions (HxWxL mm):** 379 x 313 x 169
- **Display Box Dimensions (HxWxL mm):** 465 x 387 x 232

Product Warranty:

2 Year repair or replacement warranty
