MULTIZONE OPERATION

Smeg's MultiZone heating zone can be used as two independent cooking zones or combined into a single zone. Each zone automatically adapts to the size and position of the dishes and is heated only where the pans locate, providing better heat distribution.

BOOST FUNCTION

Boost provides an additional surge of power for even more intense heat and is ideal for heating large quantities of water rapidly.

AUTOMATIC SENSE

Auto Pot detection will automatically recognise the position of the pot or pan and illuminate the control to use for fuss free operation.

ENERGY CREDENTIALS

Save energy without compromising cooking results with the Eco Logic Advance limitation system, enabling a minimum power draw of 1.5kW.
