Dimensions

Depth	665mm
Height	850mm
Width	600mm

Features & Benefits

14 fabric care cycles

Intuitive controls with clever washing hints help you get the best results. Easy to use, the LCD display provides a simple interface to select from 14 wash cycles; including Allergy, Handwash and Super Quick. The specially designed cushioned drum provides a gentle, effective washing action protecting clothes while delivering an optimal wash performance.

ActiveIntelligence™ Technology

ActiveIntelligence™ Technology provides ideal wash conditions. Intelligent sensors determine load size and soil level before dispensing just the right amount of detergent and adjusting the wash time for optimal fabric care.

Detergent auto dosing

When in Auto Dose mode, just the right amount of liquid detergent is dispensed, based on the size and soil level of your load, as well as providing the convenience of not needing to fill the dispenser at every wash.

Quick cycles

When time is short, you can select a quick 30 minute wash without compromising cleaning and fabric care. Vortex Wash allows most cycles to take less than 1 hour to complete. Water is forced from the bottom of the drum, so detergent and heat reach your clothes faster, cleaning quickly and avoiding over-washing.

Wash larger loads

The large 12kg drum can wash both small and large loads as well as bulky items like a king size feather duvet. The wide door opening makes it easy to load and unload. The benefit of a large capacity is time saving, as a full week's laundry can be done in just a few loads. Accurate water level sensing makes it highly efficient at washing different load sizes.

Designed to match

The complete package for a beautiful laundry. The ActiveIntelligence™ washing machine and 8kg Heat Pump Condensing Dryer were designed to match. With outstanding aesthetics and complimentary wash and dry cycles, they become the perfect pair to deliver complete fabric care.
