

INDUCTION COOKTOP

>> INID77 cooktop/INDUCTION/ceran/77cm

schweigen IN.

Pre-set Cooking Programmes

Effortlessly adjust an accurate heat. 42°C is ideal for melting butter and chocolate, 70°C for reheating soups and casseroles, 94°C for pasta or rice without mess.

Bridge Function

You can combine two heating zones and control them simultaneously.

Stop & Go

Pause all active functions at a touch. When you return, one more touch restores your original settings.

Child Lock

Prevent the cooktop from being accidentally activated.

Timer

You can set a cooking time for each individual zone of your cooktop.

Square Heating Zones

Innovative square inductors ensure you get complete coverage to the base of your vessel, even popular griddle plates.

4 X Booster

This feature allows you to borrow power from an adjacent zone to achieve a more rapid boil.

Residual Heat Indicator

Alerts you that the heating zone remains hot even though it is no longer in use.
