

VC-F700G

2000W Powerful bagless
Titanium Silver finish

Features

- Maximum Consumption Power 2000W
- Suction Power 360W
- Cyclone Force Multi Chamber
- Motion Sync Design™
- Dust Sensor Handle
- Titanium Silver Finish
- Handle Control
- 79dBa Noise Level (High Suction Mode)
- 74dBa Noise Level (Silent Mode)
- 2.0L Dust Capacity
- HEPA 13 Exhaust Filter
- 9m Cord Length
- Aluminum Telescopic Pipe
- Bagless Vacuum

Other

Available Time	August 2013
RRP	\$749
SAP Code	VC20F70HUCC/SA
EAN Code	8806085692558

Brushes / Accessories

- Silencio Force Brush (NB-810)
- Power Pet Brush
- Parquet Master
- Dust Sensor

Dimensions

Net Weight	7.1kg
Package Weight	12.5kg
Net Width	308mm
Net Height	342mm
Net Depth	481mm
Gross Width	342mm
Gross Height	373mm
Gross Depth	627mm

Design

Innovation

Samsung's F700G Presto is designed to offer consumers a premium bagless vacuum cleaner with stable and easy movement that smoothly follows you through Motion Sync Design™. With powerful suction power and a Cyclone Force Multi chamber designed to maintain long lasting suction, the cleaning process can be completed easy and effective.

Motion Sync Design™

Featuring a Motion Sync Design™ with a swivel body separated from the wheels, enabling the vacuum cleaner to turn easy when suddenly changing direction. The cambered wheels supporting the body ensure more stable movement without tipping or falling over, and are big and hollow so they roll smoothly with the minimum amount of effort.

Cyclone Force Multi Chamber

CycloneForce Multi features an interior structure with fourteen inner chambers that create a multi cyclonic airflow. Its strong centrifugal force separates almost all the dust particles and debris from the air and keeps them from leaving the chamber.

STEP 01

Unique interior structure generates strong cyclone airflow.

STEP 02

Strong centrifugal force separates dust & air

STEP 03

After small dusts are separated, clean air goes out through pre-motor filter

Dust Sensor Handle

The Samsung vacuum cleaner features a Dust Sensor that signals a red light if it detects a dusty spot. The Dust Sensor handles can help you to ensure everywhere is spotless.
