### Smart Multi Sensor

Smart Multi Sensor enables three main functions: reheat, defrost and cook. This Smart Multi Sensor helps to prevent over or under cooking by sensing food's surface temperature.

The smart Multi-Sensor is designed to help you cook food with precision by reading a food's surface temperature each second to determine whether cooking stages are completed, helping to eliminate over- or under-cooked meals.

Sensors enable optimal defrosting in accordance with the type of food's (meat,

### Large Turntable

Don't be deterred by meals that require more space. The Samsung MS34F606MAT boasts a 345mm tray insert, so there is room for more in your Smart Oven.

### Ceramic Enamel - Four Way Practicality

- 1** **Peace of Mind**  
Rest assured with Samsung's 5 year warranty on the interior Ceramic Enamel cavity (inclusive of parts and labour)\* This is in addition to the rights of consumers under consumer guarantees pursuant to the Australian Consumer Law.
- 2** **Easy to use**  
The MS34F606MAT is designed to help cook delicious fuss-free microwave meals. Samsung's non-stick, easy cleaning Ceramic Enamel interior is designed to be easily cleaned with a damp cloth.
- 3** **Reduces Bacteria**  
Samsung's Ceramic Enamel is designed to help to reduce the growth of common bacteria, which helps provide a clean interior cooking surface.\*  
\* Tested against Staphylococcus aureus and Escherichia coli by an Australian Microbiology Laboratory 2011
- 4** **High scratch and rust resistant**  
The Ceramic Enamel surface is both hard wearing and highly scratch and rust resistant. It is also highly resistant to staining and discolouration which may be caused by the cooking process.
