## 60CM Multifunction Pyrolytic Oven

Whirlpool®

### FEATURES & BENEFITS

#### PYROLYTIC SELF CLEANING

The cleaning process that uses super high temperatures of 500°C, to turn food residue and grime into ash. This cleaning process is convenient as it requires minimal effort. Once the oven is cooled, it's very easy to wipe the small amount of residue ash with a wet sponge and then dry with a microfibre cloth.

#### TURBO GRILL

Fan grilling technology that cooks quickly and more evenly with a boost of hot air surrounding the grill zone. This feature has been designed to create a spit roast effect, so even thicker pieces of meat are crisp on the outside and tender on the inside.

#### FAN FORCED AIR COOKING SYSTEM

A quick and easy cooking method that doesn't require pre-heating. The fan distributes hot air evenly to all parts of the oven and even allows you to cook different foods simultaneously without mixing taste or smell.
